METRIC CONVERSIONS

Factors for converting inch-pound units to metric (International System) units are given in the following table:

Multiply inch-pound unit	By	To obtain metric units
foot (ft)	0.3048	meter
gallon per minute (gal/min)	0.06309	liter per second
inch	25.4	millimeter

National Geodetic Vertical Datum of 1929 (NGVD of 1929): A geodetic datum derived from a general adjustment of the first-order level nets of both the United States and Canada, formerly called "mean sea level."

RECORDS OF WELLS, DRILLERS' LOGS, WATER-LEVEL MEASUREMENTS, AND CHEMICAL ANALYSES OF GROUND WATER IN HARRIS AND GALVESTON COUNTIES, TEXAS, 1980-84

ABSTRACT

Information on major new water wells in Harris and Galveston Counties was compiled by the U.S. Geological Survey from 1980 to 1984. This report presents the results of the hydrologic data collection on new large-capacity and other selected wells, including well location and completion data, drillers' logs of the strata penetrated, water levels, and chemical quality of the produced water. These water-well data are supplementary to similar data on older wells in these counties and to descriptive evaluations of the ground-water resources which have been published previously.

INTRODUCTION

The collection of hydrologic data in Harris and Galveston Counties, Texas, was begun by the U.S. Geological Survey in Harris County in 1929 and in Galveston County in 1938. The current data-collection program is in cooperation with the city of Houston and the Harris-Galveston Coastal Subsidence District.

The data-collection program consists of an inventory of new large-capacity and other selected wells, the collection of water samples from wells for chemical analyses, and inventory of ground-water pumpage, water-level measurements in observation wells, and a compilation of information on land-surface subsidence.

This report presents records of wells, drillers' logs, water-level measurements, and chemical analyses of ground water collected during 1980-84 (tables 1-8). Additional information on the geology and hydrology of the area may be found in publications listed in "Selected References."

Most of the chemical-quality data presented in this report were from analyses by the laboratories of the U.S. Geological Survey, but some data were obtained from commercial laboratories. Alkalinity ($CaCO_3$), dissolved solids (sum of constituents), and hardness (Ca, Mg) from commercial laboratories were recalculated to correspond to Geological Survey reporting methods. Geological Survey analyses for bicarbonate, alkalinity, specific conductance, pH, and temperature are determined in the field, all chemical analyses have values rounded according to Geological Survey significant figures requirements.

WELL-NUMBERING SYSTEM

The well-numbering system used in this report was devised by the Texas Water Development Board for use throughout the State. Under this system, each 1-degree quadrangle is given a number consisting of two digits. These are the first two digits in the well number. Each 1-degree quadrangle is divided into 7-1/2 minute quadrangles which are given two-digit numbers from 01 to 64. These are the third and fourth digits of the well number. Each 7-1/2 minute quadrangle is divided into 2-1/2-minute quadrangles which are given a single-digit number from 1 to 9. This is the fifth digit of the well number. Finally, each well within a 2-1/2 minute quadrangle is given a two-digit number in the order in which it was inventoried, starting with 01. These are the last two digits of the well number.

On the well-location maps (figures 1 and 2) the last three digits of the well number are shown at each well location, the second two digits are shown in the northwest corner of each 7-1/2 minute quadrangle, and the first two digits are shown by the large block numerals 60, 64, and 65.

In adition to the seven-digit well number, a two letter prefix is used to identify the county. The prefix for Harris County is LJ and for Galveston, KH.

Table 1.--Records of Wells in Harris County

Water Levels and Drawdown : Reported water levels given in feet, measured water levels given in feet.
Use of Water : H, domestic; I, irrigation; N, industrial; P, public supply; R, recreational; T, institution; U, unused.
Water-Bearing Unit : CHCT, Chicot aquifer, EVGL, Evangeline aquifer; JSPR, Jasper aquifer.
Type of Data Available : C, caliper log; D, drillers' log (see table 2); E, electric log; I, induction log; J, gamma-ray; L, lateral log; M, microlateral log; N, neutron log; Q, chemical analysis (see table 4); S, sonic log; W, water-level measurements (see table 3).

Table 4.--Chemical analyses of water from wells in Harris County

[Water-bearing unit: CHCT, Chicot aquifer; EVGL, Evangeline aquifer; JSPR, Jasper aquifer. For commercial lab analyses, sodium and potassium are calculated and reported as sodium (Na). mg/L, milligrams per liter; µg/L, micrograms per liter; µS/cm, microsiemens per centimeter at 25 degrees Celsius; deg C, degrees Celsius; t, trace]

Well	Owner	Depth or producing interval (ft)	Water-bearing unit	Date of sample	Silica, dissolved (mg/L as SiO2)	Iron dissolved (µg/L as Fe)	Manganese dissolved (µg/L as Mn)	Calcium dissolved (mg/L as Ca)	Magnesium, dissolved (mg/L as Mg)	Sodium, dissolved (mg/L as Na)	Bicarbonate (mg/L as HCO3)	Alkalinity (mg/L as CaCO3)	Sulfate dissolved (mg/L as SO4)	Chloride, dissolved (mg/L as Cl)	Fluoride, dissolved (mg/L as F)	Dissolved solids constituents (mg/L)	Hardness (mg/L as CaCO3)	Specific conductance (µS/cm)	pH (Standard units)	Temperature (deg C)

a/ Analyzed by Pope Testing Laboratories, Inc.
b/ Analyzed by Edna Wood Laboratories, Inc.
c/ Total iron (Fe).
d/ Total manganese (Mn).
e/ Total fluoride (F).
f/ Analyzed by Curtis Laboratories.
g/ Analyzed by Alpha Nuclear Laboratories.
h/ Analyzed by Texas Department of Health Resources Laboratories.
i/ Sample obtained by airlift.
j/ Analyzed by Orlando Laboratories, Inc.

Table 5.--Records of Wells in Galveston County

Water levels and drawdown : Reported water levels given in feet.
Use of water : H, domestic.
Water-bearing unit : CHCT, Chicot aquifer.
Type of data available : D, Drillers' log (see Table 6).

Well	Owner	Driller	Date completed	Casing		Screen		Water-bearing unit	Altitude of land surface (feet)	Water level		Use of water	Discharge (gallons per minute)	Drawdown (feet)	Type of data available
				Depth of well (feet)	Diameter of well (inches)	Length (feet)	Depth interval (feet)			Below land surface datum (feet)	Date of measurement
